Professor Levitt
Spring 2014

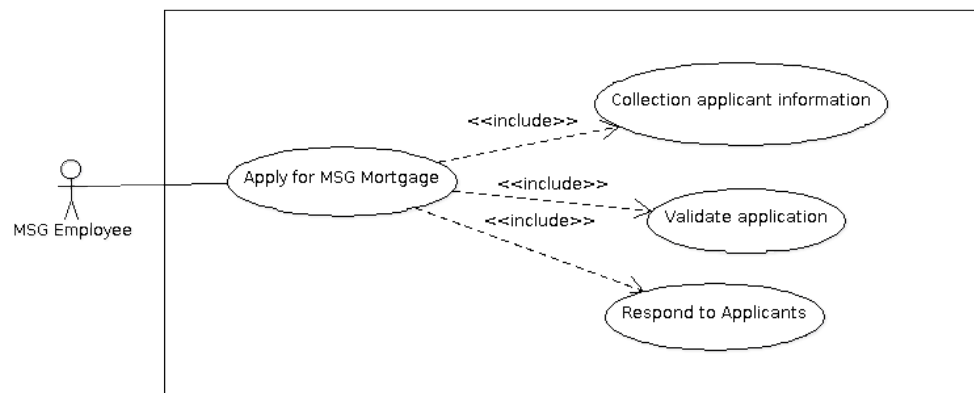

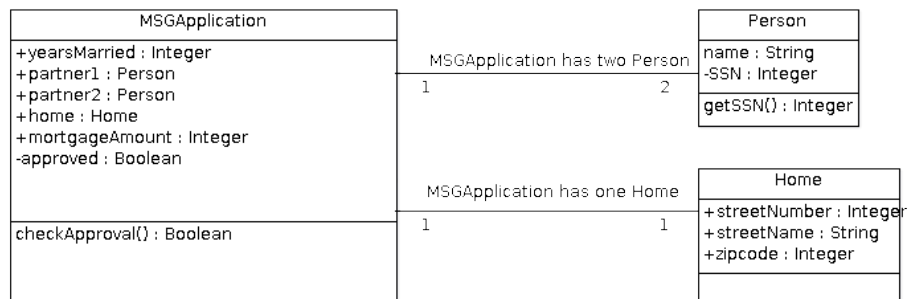

1. We require this additional requirement:

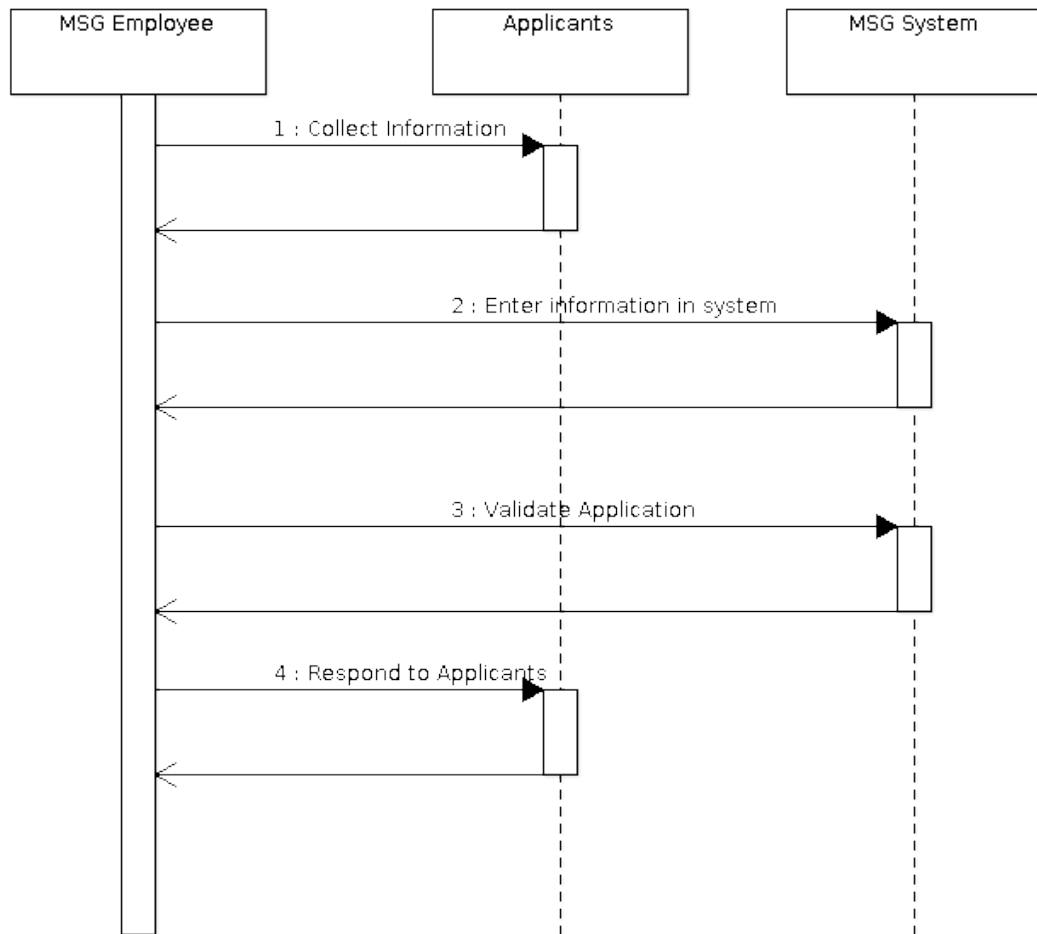

A book can only be added to the set if it passes the test of the censor.

2. For the additional use case “Apply for an MSG Mortgage”

The applicants would fill out a form with the couple’s information. The form would need to request financial details along with home details. An MSG employee would then input the information into the system.

3. For the checking system
